CARBON CHRONICLE

Job Printing of
Every Kind

Vol. 5, No. 25

Carbon, Alberta, Thursday, July 21st 1927

\$2.00 a Year

Gamble Items

Mr. and Mrs. Wm. Gibson went on a camping trip to Sylvan Lake and Edmonton last week.

Mr. and Mrs. S.N. Wright have visiting with them Miss Hazel Long and Jimmie Long of Calgary

and Miss Ione Munroe of Red Deer

Mrs. H. Barrett and Miss Catherine Fitzgauld of Calgary are visiting at the home of Mr. and Mrs. L.B. Hart.

Miss Ethyl Wright visited Miss Ione Munro of Red Deer last week and returning home Tuesday.

LITTLE ITEMS OF LOCAL INTEREST

Mr. and Mrs. P. Edwards motored to Calgary on Sunday.

J. E. Dufour, who has been relieving in the C.P.R. depot here for the past three weeks, left on Monday for Knee Hill.

Mr. and Mrs. H. Willson returned from Sylvan Lake on Saturday, after spending the past three weeks holidaying there.

Mr. Govin, Mr. Charlebois and two sons, Art and Eugene, returned from the Peace River district last Wednesday.

Mr. and Mrs. S. N. Wright took in the Stampede in Calgary last week.

J. A. MacDonald returned Sunday after spending the past three weeks holidaying at Eastern points.

Mr. Charlebois and family motored into Calgary Thursday, returning on Saturday.

L. Poxon, A.F. McKibbin and Wilfred Poxon returned from the City on Friday.

H. Holmes of Drumheller was a visitor in Carbon on Sunday.

R. H. Purdy, D. F. McKinnon and M. Roberts motored into Calgary on Friday evening.

The Misses Nora and Vera Atkinson were visitors in Drumheller over the week end.

Misses Lottie Smith and Phyllis Hephner, and Dolphy McKinnon and Clayton Hay motored into Calgary on Friday, returning Sunday afternoon.

Mrs. Malton, Mrs. Peters, Miss May Williams, Mr. Nash and Daphne, took in the Circus in Drumheller.

J. W. Baird left on Tuesday for New Westminster, B. C., after spending the past couple of months looking after his business interests here.

Mr. and Mrs. Stewart Tighe of Didsbury, were visitors at the home of Mr. and Mrs. H. N. Elliott over the week end.

Roy English left last Friday for the coast, where he will spend the next few weeks.

H. N. McNaughton was a visitor in Calgary over the week end.

Mr. and Mrs. J. J. Greenan returned to Carbon on Monday after spending the past week at Banff.

Mrs. H. Elliott and Mrs. Smith, left on Tuesday for Vancouver and Victoria and expect to be gone a month or so.

Born to Mr. and Mrs. H. Johnson, on Friday, July 15, a son.

Mr. and Mrs. S. J. Garrett spent the week end in Calgary.

Mr. and Mrs. R. Coburn and daughter, Norma, returned on Monday after spending the past two weeks holidaying in Edmonton.

Word has been received that Miss Nora Kettleson, former school teacher of Carbon, and George McNeil also recently of Carbon, were married in Calgary last week.

Geo. Tutt installed lightning rods on the Municipal Office and on the home of Mr. and Mrs. S. F. Torrance last week.

CARBON SPORTS WERE A SUCCESS

Carbon was favored with a bright clear day for its sports on Wednesday and a good sized crowd turned out for the occasion.

The first part of the programme was the automobile parade in the morning and prizes for the best decorated cars were as follows:

First, Gottlieb Ohlhauser; second John Leiske; comic, Geo. Appleyard.

Athletic and water events took place in the afternoon, but space is lacking for the publication of results.

The first ball game of the afternoon was played between Swalwell and Rockyford and ended in a brawl, the game being awarded to Swalwell with a score of 5-6 in their favor.

The second game was played between Swalwell and Three Hills. This was a real game and ended with the score of 11-6 in favor of Three Hills.

This gave first money to Three Hills and second to Swalwell.

The dance in the evening was successful in every way and a large crowd from outside points attended and helped make the day a complete success.

Mr. and Mrs. R. Williams of Drumheller, wish to thank all their kind friends in Carbon and District, for sympathetic condolence and floral tributes in their recent sad bereavement.

Mr. and Mrs. Geo. Wise and family wish to kindly thank all those who willingly gave any assistance and also all those who sent floral tributes in the recent sad death of Frank Williams which occurred while he was visiting with them at Carbon.

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoacetic-acidester of Salicylic Acid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Outdoors

The editor of this column steps aside this week to give place to the following "Four Minute Essay" by Dr. Frank Crane, and to commend it to all readers as well worthy of adoption:

A good dose of Outdoors would cure almost anything. Quit wearing a hat and let your hair Outdoors, for that bald spot. Go barefoot, and your feet will slip back ten years. Take off your clothes and lie on the sand in the sun, acquire a rich tan, and you will become healthy as a savage.

Go Outdoors and find a appetite. It's out there somewhere. Go Outdoors and get rid of Nerves. They live in the house. Other rats and mice that infest houses are Dyspepsia, Constipation, Liver Complaint, Pepplessness and Insomnia.

Not only Bodily Ailments, but all other kinds of plagues and nuisances are house creatures.

Creeches were all made in stuffy rooms. Religion, faith, hope, love, and courage inhabit the woods and meadows, sail the seas, and seek wind and sun.

Jesus taught Outdoors. Ecclesiastical Councils are held behind closed doors. The decline of religion is traceable from the Sermon on the Mount to the asphyxiating Meeting House.

Education ought to be Outdoors. My favorite dream is the University of Outdoors, where pupils go shoeless and hatless and learn under the stars.

This University would teach the child how to be as healthy as a panther. And healthy bodies would obviate most neurasthenic intellectual vagaries.

Where but Outdoors can you learn Botany, Geology, Astronomy, and the like. Real Science lives Outdoors, as much as Leap-Frog.

Play Outside. Prisoner's Base is better than Whist.

Even kissing is better Outdoors. Copenhagen is much better for your general system than twining on the parlor sofa. When you chase a girl half a mile to kiss her you realize what real kissing is.

Eating is better Outdoors. A horse is healthier than a man because a horse has to walk after every bite of grass he gets.

Outdoors is the solution of the Prison problem. From cell to sunshine means from the destruction to the reconstruction of the human waste-heap.

Insane patients who are violent when locked up become peaceable Outdoors.

Children thrive Outdoors and pine in the house. Outdoors is cheap and plenty.

God made Outdoors; man made Indoors.

And God lives Outdoors; in man-made edifices—Idols.

New Device for Motor Cars

Electric Brake Will Use Less Current Than Horn

The near future may see the adoption of an electric brake system on passenger cars that will require the least energy on the part of the driver to stop the heaviest type of machine within a short distance.

This type of brake is being manufactured for use on heavy trucks and trailers, and is being found more practicable than the mechanical type.

The apparatus requires less electricity to operate all four brakes on a heavy passenger car than is needed to run one headlight or to blow the horn once, it is said.

If a man is out of his head he is apt to put his foot in it.

Children Cry For "Castoria"

Especially Prepared for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 20 years to relieve babies and children of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep without opiates.

The genuine bears signature of
Chas. H. Fletcher.

Owns Pig With Two Mouths

Alberta Farmer Says Animal is Otherwise Normal

C. E. Henninger, a farmer, is the proud owner of a freak member of the swine family. The pig in question was born with two mouths, has two sets of teeth and two tongues but does not require double the amount of fodder. One of the mouths is stationary but both tongues move in unison. The creature appears to be normal in all other respects.

On one day the Henninger Farm saw an increase of thirty-nine animals within three hours. In all 28 pigs, a colt and ten chicks were born within that time.

"If every rancher had a similar increase, the country would be soon overstocked," Mr. Henninger humorously observed.

Plan to Shorten Voyage

Passengers Will Be Catapulted in Seaplanes From French Liner

Passengers will soon be catapulted in seaplanes from the deck of the Ile De France, latest addition to the French Line fleet to cut short the voyage across the Atlantic ocean. It is announced in a cable to the French Line.

The cable came from the Ile De France, which was en route to the United States on her maiden voyage. The plans call for the seaplanes being shot from the liner off the Grand Banks whence they will carry passengers to seaboard cities of the United States and Canada.

The seaplanes will not be added until the liner has made several trips.

Are you acquainted with any man who flatters his wife?

Keep Minard's Liniment near at hand.

Prince Favors Playgrounds

Glad to See Movement to Provide Place for Poorer Children

The British National Playing Fields' Association, which has issued an appeal for "£1,000,000 and many acres," states that there are in England 4,000,000 boys and girls who are without such facilities and that many great cities have not a single football field or cricket pitch for the use of the poorer youths. The King on his birthday placed two of the Royal paddocks at Hampton Court, containing about six acres, at the disposal of the Association. In the absence of the Duke of York, who is president, the Prince of Wales on his return from the Derby visited a broadcasting station and gave a wireless talk in support of the movement.

As a lover of games himself, the Prince said that he was really glad to see on foot a movement to provide proper playing fields for these 4,000,000 boys and girls and that he hoped soon to see the day when not one of them could say, "I have nowhere to play."

Drives Out Rheumatism Subdues Lumbago

Brings Ease and Comfort to the Sufferer at Once

NERVILINE

A King Over Pain

Those who seek permanent relief from the grinding pain of Rheumatism and Lumbago should read the letter of F. E. Normand, from Georgetown, who writes:

"I was fairly crippled with aching joints and Rheumatism. Nerviline must have been what I needed, because it cleared up my trouble quickly."

"If you need a reliable, strong, penetrating pain remedy, one you can depend on, get a 25c. bottle of Nerviline today; it will make you well quickly."

Greatest Menace to Motorists

The two greatest menaces to the safety of motorists are the speed mania and the level crossing. When it is properly appreciated that roads are not race tracks and that level crossings are a species of death trap, the number of fatal accidents caused by the automobile will become practically negligible, at least in comparison with what has been the case the last few years.

Miller's Worm Powders act mildly and without injury to the child, and there can be no doubt of their deadly effect upon worms. They have been in successful use for a long time and are recognized as a leading preparation for the purpose. They have proved their power in numberless cases and have given relief to many children, who, but for the good offices of this compound, would have continued weak and enfeebled.

The First Economy

A young man proposed to a girl and was accepted. After their first tender transports were over they fell into serious talk.

"Now that we are engaged," said the girl, "we must begin to economize. Promise me, darling, that you won't do anything you can't afford."

The young man laughed grimly. "If I promised you that," he said, "I'd have to break off our engagement."

Great Britain, Canada, France and Italy have paid bonuses to their world war veterans.

DYSENTERY WAS SO BAD BECAME ALARMED

Mrs. Wallace Pepper, R.R. No. 6, Simcoe, Ont., writes:—"Last summer I was very bad with dysentery. I lost my appetite, and had such severe pains in my abdomen they made me very faint. I passed blood which greatly alarmed me, so I hurried to the doctor. He told me the quickest way to get rid of it would be to take

"I took only part of a bottle and was completely relieved. I feel I cannot recommend it too highly."

This wonderful bowel complaint remedy has been on the market for the past 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Urges Vaccination to Prevent Tuberculosis

French Doctors Would Have New Vaccine Given to All Children

The success obtained by the use of the anti-tuberculosis vaccine developed by Dr. Albert Calmette of the Pasteur Institute has led to a movement among French medical authorities in favor of the universal vaccination of children.

Results just tabulated up to the present year show that from 21,000 cases of vaccination with the Calmette vaccine, which is known as "BCG," there have occurred only 1 per cent. of deaths from tuberculosis, while the tubercular mortality among unvaccinated children is shown by medical statistics to reach 26 per cent.

Professor Calmette explains that his vaccine does not inoculate the patient with the disease, but "suggests" the disease and rouses anti-tubercular bacilli to activity. This has been done through use of vaccine obtained through reducing the virulence of the tuberculous bacilli by the inbreeding of weakened bacilli until an innocuous vaccine is evolved which is only strong enough to suggest tuberculosis in the system.

Early experiments were made with laboratory animals, and then with monkeys, over a period of thirteen years before the scientists of Pasteur Institute felt sure enough of the harmlessness of the vaccine to test the effect upon man. The vaccine need not be injected, but may be administered in food.

Despite the apparent success of this vaccine, French doctors report a general hostility upon the part of the public to anti-tubercular vaccination, the same objections being advanced as those opposing vaccination for smallpox and typhoid. But an increasing number of physicians are becoming interested and the use of the vaccine has already spread to all countries of Europe.

Dust Causes Asthma

Even a little speck too small to see will lead to agonies which no words can describe. The walls of the breathing tubes contract and it seems as if the very life must pass. From this condition Dr. J. D. Kellogg's Asthma Remedy brings the user to perfect rest. It relieves the passages and normal breathing is firmly established again. Hundreds of testimonials received annually prove its effectiveness.

Russia Building Airplanes

Equipment of Soviets Increased by Sixty New Machines

An increase of more than sixty aeroplanes in the aerial forces of the Soviet union is announced as the result of a country-wide campaign conducted under the watchword, "Our answer to Chamberlain."

(This refers to the breaking off of diplomatic relations with Russia by Great Britain).

Reports from 23 provincial cities published at Moscow announced the intention of the various unions in those places to construct from one to twelve aeroplanes each.

Leningrad leads in the building program.

English scientists are experimenting with an electric machine designed to eliminate the dense fogs which visit London.

A system of communication by eye-lid talking to balk criminals is being used by detectives in Canada.

Minard's Liniment for warts and Pimples.

First Yokeless Egg

Adolph Goldberg is an egg candier; he has been one for 30 years. But not until the other day did he ever see an egg without a yolk. He took it to the Museum of Natural History, New York, where officials agreed that it was the first on record.

WEAK, LISTLESS GIRLS

Need Such a Tonic as Dr. Williams' Pink Pills to Restore Health

When a girl in her teens becomes pale and sallow, especially if at the same time she shows inclination to tire easily, a listlessness and inattention to her work or studies, she needs Dr. Williams' Pink Pills, a tonic which directly and specifically corrects the condition from which she is suffering. A chemical analysis of the blood of such a girl would show it to be deficient in just the elements Dr. Williams' Pink Pills can supply. But an analysis of the blood is not needed—the physical signs are plain. Among these signs are a pallor of the cheeks and lips, dark circles under the eyes, easily tired and breathless after slight exertion. Poor appetite, headaches, and sometimes fainting spells follow; often the patient is nervous and is startled at the least noise. In all run-down conditions there is no other tonic will build you up so quickly and so surely as Dr. Williams' Pink Pills. The statement of Miss Dorothy Lumbkin, Bush Island, N.S., will bring hope to other weak girls. She says:—"I wish from my heart I could persuade every person who is in a run-down condition to give Dr. Williams' Pink Pills a trial. About a year ago I was a weak girl suffering from impoverished blood and a run-down system, with many of the attendant symptoms. I had often read of Dr. Williams' Pink Pills and decided to take them, and after using six boxes I feel as well and strong as ever. Dr. Williams' Pink Pills will be my standby in the future if ever my blood needs building up again, and I shall always find pleasure in recommending them to others."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Selling Deer Antlers

Reindeer have shed their antlers and native herders at Nome, Alaska are busily gathering and transporting them to the coast for shipment to the south. The bone material is valuable for many articles of manufacture.

For Both House and Stable. There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and mishaps in both human beings and the lower orders of animals.

At a depth of 66 feet the water of the Dead Sea is twice as salt as it is on the surface, and at 1,000 feet three times as salt.

Whether the corn be of old or new growth, it must yield to Holloway's Corn Remover.

An electric shoe-polishing machine that shines both shoes automatically and in only three minutes, has been developed.

KEEP QUIET!

**WORLD HAPPENINGS
BRIEFLY TOLD**

The Duke and Duchess of York received a warm welcome home upon their arrival at Portsmouth, June 27, after their six months visit to Australia.

The Council of the League of Nations decided to invite the United States to the League's third international transit conference at Geneva, Aug. 21.

Three persons were killed when an aeroplane fell 3,000 feet in the outskirts of Winner, S.D. in an effort to restore the hearing and speech of a deaf mute.

Canadian employment conditions at the beginning of June showed a more favorable aspect than in any other month since 1920. Approximately 13,696 more workers were employed on June 1 than on May 1.

Twenty so-called Kirghiz noblemen have been arrested and banished and their property including some 20,000 sheep, confiscated because of the former Czarist affiliations of the so-called noblemen.

Jugo Slavia has an aspirant for trans-Atlantic flight honors. The newspapers say that the aviator, Beulinbach, is making preparations for a flight from Belgrade to New York in the near future.

The population of Ontario for the calendar year was 3,108,000, the latest vital statistics report issued by the provincial government shows. The urban population is given as 1,478,159, and the rural population is 1,629,841.

Two hundred and seven persons in the United States paid taxes on incomes of \$1,000,000 and over for the calendar year of 1925, as compared with 75 in 1924 and 206 in 1916, the previous high mark.

Hon. Rodolphe Lemieux, Speaker of the Canadian House of Commons, was unanimously elected by the Paris Academy of Moral and Political Science, as the foreign member of the academy in place of the late Cardinal Mercier of Malines, Belgium.

Dairy men from the four western provinces will gather in Regina for the western Canada dairy convention, to be held Feb. 7-10, 1928. The board of directors of the Saskatchewan Dairy Association decided on this at its meeting held recently.

Both Were Mistaken
Playing over an Irish links, a choleric colonel lost his ball and accused his caddy of having stolen it. When a moment later it was found the golfer began an apology. "Arrah, niver mind at all, at all," said the boy. "You thought Oi was a thaffe and Oi thought you was a gintleman, an' hegeriah, we both made a mistake."

Justice may be blind, but she has a good memory.

W. N. U. 1688

Want Increased Annual Grant
Saskatchewan Livestock Board Approach Provincial Government
An increase of \$5,000 in the annual grant from the provincial government will be asked by the Saskatchewan Livestock Board, it was decided at a meeting held in the Legislative buildings, Regina, Mon. C. M. Hamilton, provincial minister of agriculture, took the matter into consideration after hearing D. T. Elderkin, manager of the Regina exhibition, and R. W. Johns, manager of the Saskatoon exhibition, speak in support of the application. The board at present receives a grant of \$10,000. In explaining the uses to which the extra \$5,000 would be put it was stated that \$1,000 would be used for the board's expenses and the remaining \$4,000 would be divided equally between Regina and Saskatoon winter fairs. The \$10,000 grant has in the past been split equally between Regina and Saskatoon winter fairs.

That the winter fairs are essential to the development of the livestock and poultry industry of the province was stated in the resolution sanctioning the request to the government which also added that the progress of the winter fairs is being handicapped by the lack of funds.

Both Mr. Elderkin and Mr. Johns, in their statements indicated that the winter fairs had been run at a loss but added that they had an important part to play in the development of the livestock industry in the province.

It was explained that the \$1,000 sought for the expenses of the board included \$500 in connection with the proposal to send a livestock judging team, consisting of five boys, to the Royal Fair at Toronto.

The various stock selection committees were appointed in connection with the Royal winter show at Toronto and the International at Chicago.

Miracles in Crime Detection
Seattle Criminologist Thrills Delegates to Convention of Chief Constables Association

Crime, its deep rooted causes in human nature and social conditions, the mechanism of its detection, its punishment and cure, the handling of the convicted criminal, the development, training and administration of the police officers who have those problems daily before them—all of those problems came within the scope of the deliberations of the Chief Constables Association of Canada during their annual convention.

Luke May, Seattle criminologist, and president of the North West Association of Sheriffs and Police, thrilled the case hardened veterans of police departments from every province of the Dominion with his absorbing account of the miracles of the laboratory in crime detection from clues as a dropped match, a shred of fabric caught on a window-sill, the measurement of the nicks on the blade of a knife, the identification of a strand of hair, a finger prints located on the inner workings of a pistol.

Development of scientific methods of crime detection and co-ordination of all law enforcement agencies through central state and provincial bureaus was his message. It was due to such co-operation as found in Canada that Nelson, the suspected strangler, had been apprehended.

"It was the sorriest day of his life that he chose to commit a crime in this Dominion," declared Mr. May.

Britain Must Guide Egypt
Empire's Highways Depend on Suez Canal Says Hurst
"Since Egypt must be guided in government by a foreign nation, we must be that foreign nation," declared Sir Cecil Hurst, legal advisor to the British ministry of foreign affairs in an address before the English-speaking union and the Chicago council of foreign affairs at Chicago. "Because the Suez Canal is the approach to our Australian Dominions and the Far East" Sir Cecil added, "through Egypt go the highways, arteries and living veins of British life and we must control them."

Fish prefer dark or shadowy sections of water because the ultraviolet rays of the sun are harmful to them. All other creatures, however, are benefited by the rays.

SUNDAY SCHOOL LESSON
JULY 16
SAMUEL'S FAREWELL

Bidden Text: Thy loving kindness is before mine eyes; And I have walked in Thy truth.—Psalm 26.3.
Lesson: 1 Samuel 12.
Devotional Reading: Psalm 26.1-8.

Explanations and Comments
1. "I Have Fought a Good Fight," verses 1-5.—In a solemn address in which he resigned his office as judge, Samuel stood before his people and announced that he had done their bidding in giving them a king. "And now, behold, the king walketh before you; and I am old and grayheaded; and, behold, my sons are with you." Various explanations may be given for this remark about his sons; by mentioning his age and his sons he referred to the reasons given by the people for demanding a king (1 Sam. 8.5); the sons were mature men and they proved that their father was of advanced age; he was about to abdicate his position as judge, and he bespoke their kind treatment for his sons who had been his assistants. "And I have walked before you from my youth unto this day." See 1 Sam. 2.18, when his service first began. Huddle suggests that his thought here was: The king you will find out later, but me you have known well for a long time.

Then Samuel put himself on trial and asked them to witness before Jehovah and Saul, his anointed, as judges, as to whom he had defrauded or oppressed, or of whom he had taken a bribe. "Whose ox or whose ass have I taken?" is his question. These were the most valued possessions of the people, who were farmers and shepherds. "Of whose hand have I taken a ransom to blind mine eyes therewith?" The ransom was the money offered him as judge to induce him to acquit a murderer.

Compare Paul's assertions of blamelessness in his farewell address to the Ephesian elders at Miletus, Acts 20.17-27. The people emphatically testified that Samuel's record was stainless, and he reminded them that God was their witness.

"Who shall ascend into the hill of Jehovah?
And who shall stand in His holy place?
He that hath clean hands, and a pure heart;
Who hath not lifted up his soul unto falsehood,
And hath not sworn deceitfully."

Is Still a Problem
Getting Prince of Wales Married Seems Hopeless Task

After one of the most active years in his life in which Edward Albert Christian George Andrew Patrick David Windsor, Prince of Wales and heir to the British throne, has been "engaged" or "married" more than any year since he was born, he still remains single.

Ever since 1911, when the Prince was 17, trying to marry him off has been a favorite sport. It was at that time that his marriage to Princess Victoria Louise of Prussia was mooted. The fact that the Kaiser and Kaiserin were then visiting Buckingham Palace probably gave rise to the report. Next, Grand Duchess Olga, daughter of the Czar of Russia, became the candidate—probably based on the fact that the Prince and the Grand Duchess played together as children.

The prince now often laughs at his former "tea-cup betrothals" as much as he does at all of the latest ones that are heaped upon him.

The feeling is growing in England that the Prince will ultimately turn to the strong solid stock of his own country for a wife. This type of marriage by the Prince would be the most popular he could make, for the people of England look upon him as an excellent type of young Englishman and they would like their future queen to be just as typically English.

Gift for Lady Willingdon
Winnipeg General Hospital Presenting Model of Spanish Ship
Directors of the Winnipeg General Hospital and members of the Provincial Government are making a presentation to Viscountess Willingdon of a silhouette model of a 15th century Spanish caravel. The work on the model has been done by the occupational department of the Winnipeg Psychopathic Hospital, under the supervision of Miss J. M. Stewart. Viscountess Willingdon, on the occasion of her recent visit to the city, remarked on the efficient workmanship on the model, which is a replica of a famous ship "El Rayo De Sol." As a token of regard and as a memento of her first visit to the city the government and hospital board decided to make the presentation.

**Will Revolutionize
Telegraph System**

Exact Facsimile of Messages Possible by New Wireless Discovery

Recent experiments by G. M. Wright, research worker of the Marconi Company, have brought appreciably nearer the day when messages will be sent by wireless and cable in exact facsimile of the whole message instead of dots and dashes, letter by letter, at present.

The process is an adaptation of that by which wireless photographs are being transmitted, and by this method it will be possible for whole pages of newspapers to be filed at one end of the line and received in the form of facsimile photographs at the other end.

Under Mr. Wright's experiments, messages of this kind have already been sent a few miles in facsimile.

The expense of operating under this system has naturally not yet been worked out but if the cost permits, the day is not far away when, for instance, a newspaper in Montreal can photograph its whole edition page by page and telegraph it to Vancouver for reproduction there. London newspapers could produce Canadian editions by simply wireless-ing or cabling photographs of the completed pages to a printer in Canada who by photo engraving processes could speedily reproduce the pages there.

Under this system an aeroplane observer in wartime would be able to transmit from his plane to army headquarters instantaneous pictures of enemy country and enemy activities. It is obvious that the new system will revolutionize telegraphy.

The Corliss engine at the Philadelphia Centennial in 1876 was the largest built up to that time. It was rated at 1,400 horsepower, but now single steam turbogenerator sets develop 60,000 horsepower.

**SPECTACLES
On 30 Days' Trial**

**Non-Breakable
Clear Vision**

Will give you a younger and yet more distinguished appearance.
Built for Strength, Comfort, Beauty. Light as a feather, with smooth, hand-polished nose bridge and gracefully curved temple bows that cannot cut the most tender nose or ears. A work of beauty and a delight for the wearer.

Send No Money — Perfect Satisfaction Guaranteed

Let me send you on 30 Days' Trial my famous "Crown" Spectacles. Will enable you to read the smallest print, thread the finest needle, see far or near. If you are not amazed and delighted, if you do not think my spectacles, at only \$1.98, equal to those sold elsewhere at \$15.00, send them back. You won't lose a cent. You are to be the sole judge. Hundreds of thousands now in use everywhere. Beautiful case included FREE. Just send your name, address and age on the coupon below. I will also tell you how to get a pair for yourself without cost. Cut AND MAIL COUPON TODAY.

Crown Spectacle Co., Dept. 105
60 Front St. W., Toronto, Ont.

I want to try your spectacles for 30 days. This places me under no obligation. Also please tell me how to get a pair for myself FREE.

GOVT. VICTORY IS NOW ASSURED IN MANITOBA

Winnipeg.—Premier John Bracken and his Progressive supporters were returned to power in the provincial general election with a clear-cut mandate to guide the political destinies of Manitoba for another five years.

Indications are for a Government victory in 29 of the 55 seats in the Legislature, or equal to its representation at dissolution.

The striking feature of the election however, was the showing of the Conservative Party, which in standings early compiled, was credited with 15 seats, a gain of nine. Liberals appeared to have lost two seats, with only three candidates declared elected and two leading, while Labor appeared to have weathered the storm with its pre-dissolution representation unimpaired. The gains were chiefly made at the expense of the Independent group, which had only elected one member and was leading in two. In the last hour the Independents had a voting strength of eight.

The electors of Manitoba appear to have registered a sweeping verdict in favor of extending the present facilities for the sale of beer. Winnipeg piled up a majority of approximately 15,000 for changes in the beer laws, and sale of beer by the glass in Government-licensed establishments likely will be the result. Proponents of the beer parlors out-voted those in favor of beer by the bottle under the "cash-and-carry" system by nearly two to one. Indication that the electors want the Government to continue its control over the distribution of intoxicants was shown in the defeat of the proposal which would have given the brewers the right to deliver beer direct to permit-holders.

Returning From England

Cabinet Ministers Will Sail for Canada Shortly

Ottawa.—Hon. James Malcolm, Minister of Trade and Commerce, who is at present in England will sail for Canada on July 9, according to present plans. Mr. Malcolm has visited the offices of the trade commissioners for Canada in Great Britain and will inspect several of the offices on the continent before returning.

Hon. Robert Forke, Minister of Immigration, will sail for Canada, July 23. Mr. Forke has been several weeks in London involved in negotiations with the British Government for the extension of the 3,000-family settlement scheme as well as other immigration agreements.

This month, Hon. Charles Dunning, Minister of Railways, will make the trip to Hudson's Bay accompanying Frederick Palmer, the British engineer the Canadian Government has appointed to report on the comparative merits of Port Nelson and Fort Churchill as a terminal for the Hudson's Bay Railway. Major Graham Bell, deputy minister, and Col. DuBouque, chief engineer of the department also will be in the party.

Ship License Cancelled

Panama.—Panamanian Consul Morris at Vancouver, B.C., has been ordered to cancel the Panamanian registry of the ship Federalship which some time ago was seized by the American prohibition authorities and later released on the order of a Federal court. The Panamanian action was based on the non-payment of \$115 due to the National treasury for taxes. M. Morris reported that cancellation of the Panamanian registry had been solicited by the owners of the vessel.

Authorized to Fire Salutes

Ottawa.—Edmonton has been added to the list of stations at which artillery salutes are fired on certain authorized occasions including Royal salutes on the sovereign's birthday and Dominion Day, according to an announcement by the department of National Defence.

Receives Peace Prize

Oslo, Norway.—Foreign Minister Stresmann of Germany has arrived here to receive the Nobel peace prize for 1926 which he shares with Foreign Minister Briand of France.

Canadians All

Mlle. Cartier Says Canadian is a Title to Be Proud Of

Toronto.—After 68 years, Mlle. Hortense Cartier, daughter of one of the Fathers of Confederation, St. Georges Etienne Cartier, returned to Toronto. Toronto was her childhood home between 1854 and 1859. When the Government moved to Quebec at that time she went with her father, and until today has never seen Toronto since.

Mademoiselle Cartier came from France as the guest of the Canadian Government to attend the celebration of the diamond jubilee of Confederation.

"One thing I do hope to see soon is the adjective 'French' dropped in French-Canadian," she said. "I think everyone should be just plain Canadian—and it is a title of which everyone should be very proud."

"I'm going through to the West and I am eager to get a feather crown. My father had a wonderful head dress and belt given him by the Indians."

Welcome Return of Royalty

Duke and Duchess of York Are Home After Six Months' Tour

London.—The British newspapers were filled with enthusiastic welcome to the Duke and Duchess of York upon their return from their six months tour to New Zealand and Australia. In connection with the welcome are many references to the self-sacrifice of the Duchess of York in having left her infant daughter, Princess Elizabeth, for so long a period. One writer says this gives the Duchess a link of common understanding with all those other British wives and mothers whose husbands are called to visit or make homes in the outposts of the empire and who must choose between their husband and children.

Chinese Nationalists

Suffer Defeat

30,000 Casualties Reported After Four Days' Fighting

London.—A Shanghai despatch to Exchange Telegraph says the Chinese Nationalists admit suffering the heaviest reverse of the war at Suchowfu, North Western Kiangsu province.

Attacked by General Sun Chuan-fang and his Shantungese the Nationalists evacuated the city after four days' fighting, in which they lost 30,000 men, mostly killed, and retreated 30 miles to Pengfu.

Killed in Air Crash

Flight Lieut. Anderson in Fatal Accident at High River

Calgary, Alta.—Flight Lieut. C. N. Anderson, Royal Canadian Air Force, was instantly killed when his plane crashed and burned at the High River Federal air patrol station.

The accident occurred as the flier was landing in formation, a test flight for the Jubilee Celebrations being in progress.

The wrecked ship immediately burst into flames.

Anderson was 25 years old, unmarried, and his family resides in the Brandon district.

Retains Premiership

HON. JOHN BRACKEN,

Premier of Manitoba, whose Government is returned to power.

TWO CLASSES FOR CRUISERS URGED NOW BY BRITAIN

Geneva, Switzerland.—Great Britain proposed to the technical committee of the tripartite naval conference that the cruisers be divided into two classes, one of 10,000 tons carrying eight-inch guns and the other of 7,500 tons with six-inch guns.

The United States and Japanese delegations requested time to examine the proposal "in the light of the effect it would have on the navies of each power concerned during the life of the treaty."

Some observers have expressed fears that the tripartite naval conference has reached a critical stage because the British and United States representatives have not yet been able to come together on the question of reopening the Washington treaty.

The Japanese have announced their inclination to support the British view on the question of limitation of the size and armament of battleships, consideration of which would mean re-discussion of problems thought to have been solved by the Washington treaty of 1922.

The determination of the United States delegates to restrict the conference to the scope outlined by President Coolidge's invitation to the powers remains unchanged.

Makes Parachute Descent

Toronto Girl Drops From Aeroplane At One Thousand Feet

Hamilton, Ont.—Miss Caroline Sykes, a Toronto office clerk, made what is known to be the first parachute descent from an aeroplane by a woman in Canada here when she stepped off an aeroplane 1,000 feet up in the air and made a perfect landing on the top of a mountain. Miss Sykes had been up in an aeroplane but once before. It is likely she will be employed to repeat the stunt daily at the Canadian National Exhibition in Toronto.

Dusting Wheat Fields

Will Use Aeroplanes to Control Rust by Spreading Chemicals

Pargo, N.D.—Aeroplanes for dusting wheat fields with "cola," a chemical with which experiments are to be made in the hope that it will prevent or control black stem rust on wheat, will be used on an extensive scale in Manitoba and will be tried in a smaller way in Cass County, North Dakota, it was learned here.

T. M. Shields, officer of the Royal Canadian Flying Corps, spent Sunday here en route from Philadelphia to Winnipeg with a new aeroplane which will be in dusting fields in Manitoba. It is planned to treat about 8,000 acres in the Canadian provinces.

Walter R. Reed, who is to make smaller experiments on his farms near Chaffe, N.D., conferred with Mr. Shields regarding the proposed Canadian experiment. Mr. Reed will have experiments made on three different kinds of wheat, dusting about 10 to 15-acre tracts of each.

Newspaper Men Elect Officers

Mr. Sam Wynn, Yorkton, New President of Weekly Newspaper Convention

Huntsville, Ont.—Sam Wynn, Yorkton, Sask., was elected president of the Canadian Weekly Newspapers Association at the concluding session of the annual meeting here. Other officers are: First vice-president, S. B. Anslow, Campbellton, N.B.; second vice-president, Hugh Savage, Duncan, B.C. Directors include: British Columbia, R. E. White, Kamloops; H. G. Parsons, Golden, Alberta; Charles Clarke, High River; A. R. Ennis, Leduc, Saskatchewan; C. R. Macintosh, M.P., North Battleford; D. C. Dunbar, Estevan.

Transfer of Military Units

Several Western Units Will Change Location

Ottawa.—Re-location of a number of military units throughout Canada is announced by the department of national defence.

The Westminster Regiment, "C" Company, has been transferred from Mission to New Westminster, B.C.

The Assiniboia Regiment, "C" Company, has been transferred from Manor to Indian Head, Sask.

Canadian Machine Gun Corps, No. 3 Company, machine gun battalion, has been transferred from Nanaimo, B.C., to Mission, B.C.

Hungary's Wheat Crop Less

Ottawa.—According to a cablegram received from the International Institute of Agriculture at Rome, the wheat crop of Hungary is 68,784,000 bushels as compared with 69,200,000 last year and 71,674,000 in 1925. The cablegram also states that Hungary's rye crop is 25,511,000 bushels against 30,015,000 in 1926, and 32,525,000 in 1925.

Dr. Haanel Passes

Ottawa.—Dr. Eugene Haanel, for 20 years superintendent and director of mines, died here recently, aged 86 years. He was internationally famous and held a number of degrees from Canadian and American universities.

UNITS OF EMPIRE AS ONE IN TIME OF COMMON PERIL

Chicago.—The British family of nations may bicker among themselves but they will meet an outside menace with a united front, Sir Cecil Hurst, legal adviser to the British foreign office, told a University of Chicago audience during the second of a course of lectures on "Problems of the British Empire."

In this lies the claim of empire to be a total unit and international though foreign powers might question the reasonableness of treating the empire as a unit in strength of the common allegiance to one king, Sir Cecil said.

"Families cannot be made by contract; they cannot be made or unmade by mere agreement of their members. The British empire has grown up together and as they became stronger, they may have become more self-contained more able to stand alone; but the ties which united them to the parent state remain intact."

British nations, Sir Cecil declared, will continue to act together in foreign affairs because the spirit of British autonomy is based on the admission that questions affecting the whole group cannot be left to one member of the group to conduct without reference to others.

Equality of status among nations, as among individuals did not necessarily mean equality of stature, wealth or temperament. In the British Empire equality meant the absence of any power of control by one community over another. Some inequalities still exist between the powers of the British and Dominion governments but these were being swept away.

Crops Doing Well

Favorable Crop Report Covering All Western Areas

Winnipeg.—Since the completion of seeding operations weather conditions have been entirely favorable for growth, and crops are doing well almost everywhere, according to the weekly report issued by the Agricultural Department of the Canadian Pacific Railway. Earlier sown grains are practically as far ahead as at this time last year, with the grain sown later about a week behind. A considerable percentage of the crop was put in unusually late, but with present weather conditions maintaining the rapid and healthy growth there should be no question of harvesting the crop within time this fall.

Outworms have caused damage of a minor character at a few points, but the loss in this respect does not nearly approach the average. Hail has beaten down the crops over limited acreages in a few localities in Saskatchewan and Alberta, but the grain was not sufficiently advanced to be permanently injured. The noticeable feature this year is found in the increased amount of new breaking undertaken, and the farmers are taking every advantage of the satisfactory soil moisture conditions.

Novel Flight Planned

London.—Mayor Moore announced that an invitation would be broadcast immediately to aviators to qualify for a non-stop flight from London, Ont., to London, England, for a prize of \$25,000 to be provided by a local brewery. A machine for the flight will be purchased by the same concern and handed over to the aviator as soon as one fully qualified, preferably a Canadian, has been found to undertake the trip.

Favor Amalgamation

Vancouver, B.C.—Ratepayers of Vancouver and South Vancouver by overwhelming majorities voted in favor of amalgamation of the city and the municipalities of South Vancouver and West Gray.

Increases Coal Output

Vancouver.—During the first four months of the year the coal mines of British Columbia produced \$54,236 long tons, an increase of 154,929 compared with the similar period of 1926.

Famous Explorer for Japan

Captain Roald Amundsen, famous Norwegian explorer, who has flown and sailed to the North Pole or its vicinity is taking a trip to Japan and is here shown on board the Canadian Pacific liner Empress of Asia just before leaving for Yokohama from Vancouver, B.C. With him in the photograph are G. W. Stahlshmidt, Norwegian consul at Vancouver and S. L. Prenter, of the Vancouver Harbor Commission. It is understood that Captain Amundsen is merely taking a holiday trip.

Irish Free State Making Progress As A Member Of The British Commonwealth

The only tangible bond linking together the members of the British Commonwealth of Nations since the Imperial Conference of last November is the British crown, or the person of the King, but Ireland has other interests, important among them her economic status, which bind her to Britain and the commonwealth. Timothy A. Smiddy, minister of the Irish Free State to the United States, said in a public address at the University of Chicago. Mr. Smiddy delivered one of the Norman Wait Harris lectures on the general subject of the British Empire.

"We have co-operation and no coercion, and the bonds which bind the various nations are intangible," the Irish minister said. "Whether these symbols signifying membership in an association of free nations are bonds which attach or bonds which chafe, is to be determined by future experience. Since the establishment of the Anglo-Irish treaty we have been free to work out our national life in our own way without help or hindrance from any outside source whatever."

"Nature has placed Ireland and Great Britain in close contiguity with each other, which geographical contiguity begets for Ireland a relationship to Great Britain more intimate than that of any other member of the commonwealth. This relationship is exemplified economically by the market for Irish commodities. For instance, 88 per cent. of the exports of the Irish Free State are consigned to Great Britain and Northern Ireland, and 85 per cent. of the imports of the Irish Free State are from Great Britain."

Speaking of the progress that has been made by the Irish Free State as an autonomous member of the Empire, Mr. Smiddy said: "If one of the tests of self-government is ability to insure stability, and to lay the foundations for an economic and cultural development that will create for the average citizen the opportunities for a full life, the people of the Irish Free State have already during the last five years amply justified their claim to be allowed to govern themselves."

Stubble Burning

Found to Be An Expensive Operation Under Best of Conditions

Burning of stubble has been found to be of some value in the destruction of weeds by destroying the seed plants with their seed crops before they have entered the soil. Burning stubble is, however, an expensive operation even when the latest type of oil burners is used. Tests at the Swift Current Experimental Station showed that a running fire started with an oil burner can sometimes be obtained, making the acre-cost of burning very low, but a fire of this kind can be obtained only in heavy stubble, which usually contains few weeds. Weedy stubble, it is observed, is almost always short and thin and will not carry a continuous fire, which is necessary if the weeds are to be destroyed.

The 1926 report of the Swift Current Experimental Station, which can be obtained from the Publications Branch of the Department of Agriculture, Ottawa, gives illustrations of stubble burners at work. The machine is drawn behind a rack from which straw is fed into a wide firebox. The firebox is made of sheet iron and is equipped with parallel grate-bars which slide over the stubble. A small gas engine is belted to a fan supplying a draft of air which blows the fire into the stubble. A 14-foot machine of this kind will burn from 2 to 3 acres an hour. Three men and four horses are required to keep it going. From 40 to 60 cents per acre was found to be the cost of the labor of men and horses, while the gasoline cost 2 cents an acre.

Further trials of this machine are to be made before the Station is prepared to make any recommendations with respect to its efficiency.

"Dust" from a blast furnace at an automobile manufacturing plant has been found to contain fifty per cent. iron ore, which is being reclaimed.

Winnipeg Newspaper Union

Exceedingly smart is this attractive daytime frock. The back is in one piece and the box-plaited skirt front is joined to the bodice closing in coat effect and having a notched collar, set-in pocket, long dart-fitted or loose sleeves and a trim belt. No. 1611 is for ladies and is in sizes 38, 40, 42, 44 and 46 inches bust. Size 40 requires 4 yards 39-inch, or 2 1/4 yards 54-inch material. Price 26 cents the pattern. The secret of distinctive dress lies in good taste rather than a lavish expenditure of money. Every woman should want to make her own clothes, and the home dressmaker will find the designs illustrated in our new Fashion Book to be practical and simple, yet maintaining the spirit of the mode of the moment. Price of the book 10 cents the copy.

Saskatchewan Livestock Sales

Cattle Breeders' Association Hold Successful Sales at Prince Albert and Saskatoon

The Saskatchewan Cattle Breeders' association sales which were held at Prince Albert on June 7 and 9, respectively, proved to be quite successful. In all sixty-five head of pure bred stock were sold. The quality of the stock offered was good with the exception of a few individuals that did not sell. There was possibly too high a percentage of junior yearling bulls to obtain a very high average.

The Prince Albert sale, which was held on June 7, had an average of \$112.30. In the Shorthorn classes the junior yearling and grand champion Shorthorn bull, which was contributed by the Saskatchewan Institutional farms, Prince Albert, sold to J. T. Coombs, Pleasant Valley, for \$170. The senior champion bull was contributed by R. J. Huxtable and sold to G. W. Grigsby, of Tisdale.

In the Aberdeen Angus classes the junior and grand champion bull was contributed by Wm. D. Lyon, of Deveron, and was purchased by J. G. Robertson, of the department of agriculture, Regina.

The grand champion Hereford was bred by T. A. Clark, of Lake Valley, and was a real good individual.

The Saskatoon sale proved to be more successful than the Prince Albert sale. In that the general average was \$128.65.

The sale was handled by J. W. Durno, of Calgary, and the judges were John Brandt, of Edenwold, and W. D. Lyon, of Deveron.

Thirty-one Shorthorn bulls changed hands at an average price of \$137. The junior and grand champion was contributed by the University of Saskatchewan, Saskatoon, and sold to John Gordon, Richard, for \$215. The top price of the sale was received for the first prize senior yearling Shorthorn bull and was sold to the department of Indian Affairs for \$285.

The grand champion Aberdeen-Angus bull was contributed by C. R. Wade, of Asquith, and was purchased by the livestock branch, Regina, while the grand champion Hereford bull was purchased by the department of Indian Affairs, Regina.

In the Holstein classes the aged bull, Strathmore Sir Donald Fairchild, contributed by John H. Clark, of Netherhill, was awarded the grand championship, and was sold to F. Walters, of Moose Jaw, for \$150.

The heaviest buyers at these sales was the livestock branch of the department of agriculture, and Mr. Christenson, of the department of Indian Affairs, Regina.

Hard on the Cook

New Cook: I can't get the dinner the way you told me to, ma'am.

Mistress: Why not?

New Cook: Didn't you tell me to have roast beef and gravy?

Mistress: Yes, that's what I ordered.

New Cook: Well, the butcher sent up the beef but he didn't send a drop of gravy.

National Research Laboratories Will Assist In Applying Science To Industry In Canada

Canada Leading In Export of Wheat

Will Be Greater This Year Opinion of French Expert

Louis Dreyfus, a French banker and grain merchant, who is one of the leading authorities on wheat, recently gave an address to the French-American committee in Paris in which he declared that Canada was the greatest wheat-exporting country in the world, that the grain from the Dominion had no equal in quality except some of the Russian cereal, and that supplies available from Canada would continue to increase.

With established agencies in all wheat-producing countries in the world, including an agency at Vancouver, which he personally visited last year, Mr. Dreyfus predicted that the exports of wheat from the United States, Canada and Argentina would increase to 18,000,000 tons in 1927, against 14,000,000 tons in 1926. Of this total he put the shipments from the United States at 6,000,000 tons, those from Canada at 8,000,000, and those from Argentina at 4,000,000. He termed these super-producing countries—countries that produced more than they could consume.

He expressed the belief that France eventually would produce enough wheat to supply the demands of its people, but some time hence.

Cost of Operating a "Combine"

Combined Reaper and Thresher Effects Considerable Saving

In a normal season the combined reaper-thresher will cut and thresh wheat, oats, barley, fall rye and flax at a considerable saving over the binder and separator. Investigations have been made on this point at the Swift Current Experimental Station and the results are detailed in a Dominion Department of Agriculture pamphlet entitled "The Combined Reaper-Thresher in Western Canada." It was found that a sixteen-foot combine drawn by 12 horses will cut about 35 acres in a 10 hour day. Drawn by a tractor it cuts about 44 acres in the same time.

In the case of such a combine drawn by 12 horses and operating 20 days the cost per acre was \$1.80 or 9 cents a bushel on a 20 bushel per acre crop. In similar circumstances the cost of a tractor drawn machine was \$1.64 per acre and 8 cents per bushel. Compared with this harvesting with binder and separator cost 17 cents per bushel.

Parkes—"So your wife decided to learn to drive, too."

Sparkes—"Yes, she won't stop at anything."

The announcement from Ottawa of plans for the extension of scientific and industrial research will be welcome news to the business interests of the country. Canada has lagged far behind other nations in this work. In agricultural research great progress has been made. What has been accomplished has been worth millions of dollars to the country. But while other countries have added vast industrial wealth through research we have neglected to take advantage of opportunities which lie at hand, although Canadian industrial leaders have been keenly alive to the need and have urged Government action repeatedly.

According to the announcement, on a per capita basis, the appropriation made for this extension will place the Dominion on practical equality with other countries. The United States, Germany and Great Britain are spending large sums yearly in applying science to industry and in standardization, thus securing the twofold advantage of eliminating waste and developing new processes which open fields for business hitherto unheard of. The expenditures have paid for themselves many times, just as the money spent here in developing new strains of wheat have returned fortunes. What is ahead in the reaping of harvests from our natural resources if this work is conducted along the proper lines may be imagined.

The establishment of national research laboratories available for the use of individual firms will open prospects which enterprising concerns will readily see. Large manufacturers are able to install their own laboratories but in Canada in particular are many not financially able to do this, but who nevertheless would welcome facilities for experimentation. These the Government will now provide, and interested firms will gain the benefit at small cost.

Not the least advantage will be in the premium which is thus to be placed on initiative and enterprise. Business interests alert enough to take advantage of this opportunity will probably forge ahead of their less aggressive competitors. There will be a search for new ideas and methods, while those satisfied with the routine of the past will lose out.

It is said that one of the objects of the visit in England of Hon. James Macdonald is to study British methods of research. He will there have the benefit of years of experience. It is gratifying to learn that Canada is at last to fall in line with this progressive movement.—Moose Jaw Times.

Michigan Supplies More Settlers for Western Canada Than Any Other State

The state of Michigan is apparently supplying more settlers for Western Canada than any other state in the union, according to figures submitted by Fred W. Kerr, Dominion immigration agent at Detroit, who has been in the west gaining first hand information of agricultural conditions here.

Many farmers have come from that state this year, he says. Last year, according to returns made public by U.S. authorities, Michigan sent 2,861 of the total of 21,925 farmers who left the States to take up land in Canada.

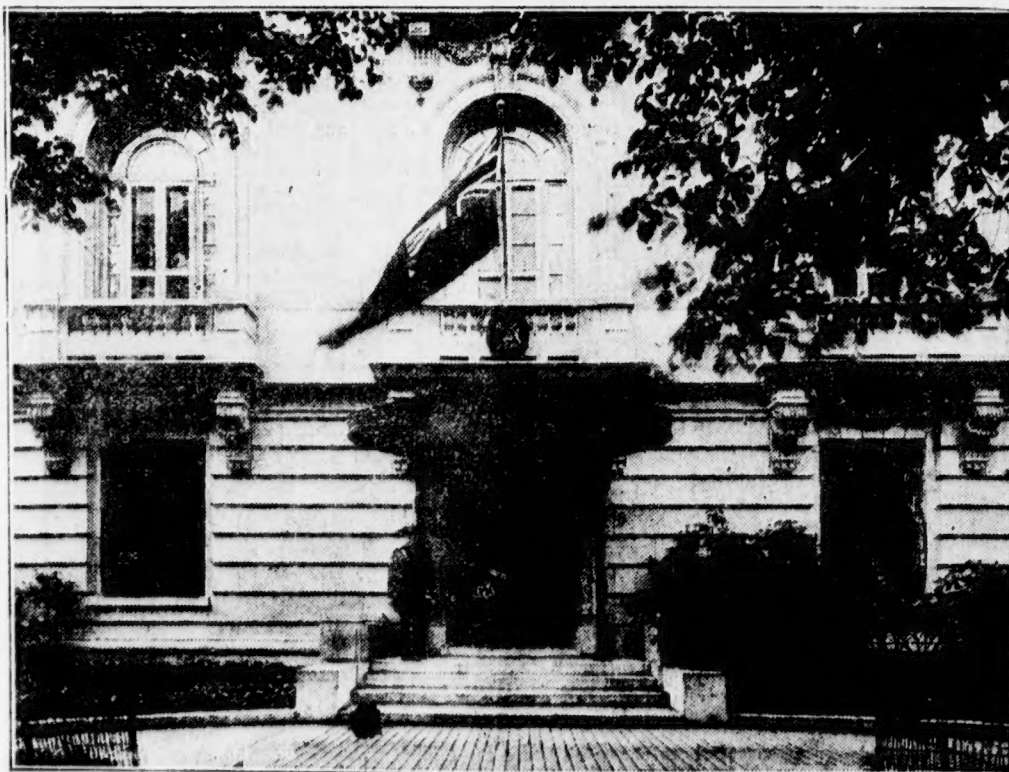

Egg Shell Not Fragile

An egg shell may be thin, but it is not fragile. An egg placed beneath the giant testing machine at the Bureau of Standards, Washington, withstood a pressure of 51 pounds before it was crushed. Two hundred tons was required to demolish a foot-square piece of timber.

Mr. Hensley—"Today is your birthday, dear, and I have a surprise for you. Can you guess what it is?"

Mrs. Hensley—"I'm already surprised. That is the first time in ten years that you remembered it."

So many shillings are put into London gas meters that a coin shortage often exists until meters can be cleared and the coins put into circulation again.

CANADA IN WASHINGTON
Home of the Minister of the Dominion to the United States, Hon. Vincent Massey. The opening of the legation is one of the marks of Canada's progress in the jubilee year of Confederation.

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER III.—Continued

From this distance Helmi could think of her work in the hotel with greater composure. She knew she was awkward sometimes, and maybe stupid, though she always tried hard to please. Anyway, it was good to have a job, even if she had to pick roots off potatoes in a mouldy, dark cellar, and gather up the rotten ones to burn in the furnace.

Helmi had the large, restless hands which generations of hard-working women acquire, eager, capable, hands ready for anything that has to be done. Even the cook, Maggie Kenny, who wasted few words of praise on her assistants, admitted grudgingly that the Finn girl "has good smart hands and makes every move tell;—if she could use her head as well, she'd do."

Helmi from the little hill on which she sat looked back at the smoky city, lying like a great giant under its greasy, gray blanket of smoke. It reminded her uncomfortably of the blankets she had to spread every morning on the beds in the rear room of the hotel. In the front of the house she knew there were pleasant rooms, with white spreads and flowered wash-basins, but at the back a great yard of a room had what seemed like a hundred beds, spread with sweaty blankets, and it was this room she had to sweep and tidy every day. Some days she found men still in bed when she went in, but having set out to tidy the room, Helmi held to her course, taking no notice of the storm of abuse which came from the late sleepers.

Helmi's dreams that Sunday afternoon as she sat on the bank were for the most part pleasant. Consciousness of youth and bounding health made her hopeful of the future. She could work and she could learn, and she too would one day go back to Finland with a velvet bag, a long white plume, and silk linings and fringe on her gloves; and all the young people would gather round her while she would tell of how she started, right at the bottom, washing ugly heavy dishes in a hotel.

Helmi always held the dream, too, that she might some day meet a prospector, maybe a young man from Finland who had found gold. Men can do such wonderful things. Women have to work hard, but pretty girls have a good chance. Lots of Finn boys had come away to Canada, and maybe she would meet some of them. She thought of the Prince who was in love with a poor girl and swore he would marry her and whose proud uncle sent him a lovely coat that had a great ugly patch of coarse cloth on it, meaning that if he married the poor girl she would be like the coarse

patch. That was a dirty thing for the bad old uncle to do. But what did the Prince do? He got the patch all embroidered with pearls and lovely jewels and sent it back signifying that his lovely poor girl would be the grandest thing about the place. Helmi guessed that held the uncle a while, maybe.

Helmi was so deep in her dreams she was unconscious of the approach of two young men. They were close upon her when she looked up. She did not like their appearance, but she felt no fear. There was strength in her right arm which brought assurance.

Helmi smiled and nodded to them as she would have if they had been two of the neighbors' boys at home.

They said something to her in English.

"Yes," she said, because it was the only word she could think of—and then added—"No talk—Finn."

The boys laughed at that and looked at each other meaningly.

Helmi's young heart was aflutter for adventure. If the young men had been dressed more elegantly she might have thought they were the successful gold-diggers of her dreams. But with a calculating eye she appraised them correctly. She motioned them to go on, which they interpreted to mean that she desired to go back to the city with them. When she began to walk away the boldest of the two followed her.

Helmi quickened her pace. The young fellow caught up to her and took her arm. She shook him off and began to run. The running thing always invites pursuit, and just as she expected, they followed. Helmi purposely let her pursuers gain on her, then, stopping and bracing herself, she gave the first one a powerful body blow which sent him rolling down the bank towards the stream below. While the other one stopped to see what injury had been done to his friend, Helmi raced on. She was neither frightened nor angry.—It was all good fun to her,—but she knew enough to put as great a distance as she could between her and them for she suspected that the young man who had gone rolling down the muddy bank, might not be pleased with her.

A woman, driving a gray horse in a buckboard, saw her coming and waited for her, deeply concerned to see the flying Helmi, who had evidently been set upon by two ruffians. Helmi sensed her concern, and climbed into the seat beside her without delay. Again came the difficulty of language. "Yale Hotel," said Helmi in answer to the unintelligible inquiries, giving the name the accent and pronunciation by the Swedish telephone girl of the hotel.

"Yell hotel?" Why should I? Why should anyone?

All of which was lost on Helmi, who merely repeated the name of her present domicile. Miss Abbie was distressed and greatly excited over the real adventure which had broken in upon her Sunday afternoon meditations. She had been making her weekly visit to the Girls' Friendly Home, where delinquent girls of the city lodged. The labors of the day were over. Miss Abbie had told the girls a beautiful story of a patient princess, held prisoner in a castle, who at last was set free by the ingenuity of her lover; and now as she drove home she was deep in a dream of golden romance.

Miss Abbie was a maiden lady of forty-eight years, thin, neat and proper, her only extravagance consisting in the number of ornaments she would hang around her neck. On the day that Helmi had bounded into her neat buggy Miss Abbie wore her Miller-gray suit of serge, with the chaste neck-piece of black fur crowned with a small hat of dovelyn and quills. All of this of course was most unobtrusive and ladylike; but hanging around her thin neck was a string of jet beads (her mother's), a gold chain (her father's), and a riot of miscellaneous articles suspended from the chain. There were keys and a kettle, a pencil which had never had lead in it, a little pig made of bog oak, with a silver ring in its back and a pierced silver urn.

In the little seven-roomed house where she lived the strictest order

Red Rose Tea, now packed in the bright, clean Aluminium package, is completely guaranteed. You can try it without any risk. Order a package from your grocer. Use any portion of it and if you are not entirely pleased return it and no charge will be made.

and precision prevailed everywhere save on the piano, where the same promiscuous spirit asserted itself. There, photos and vases, fans and shells, books and pictures, old stones, painted bottles, Easter eggs, a Buddhist idol, basket and candlesticks crowded and jostled each other for standing room.

Miss Abbie's life showed the same unevenness. Years of careful puritanic living would suddenly give way to unexpected outbursts of wild extravagance. After living in one room in the house of a friend she horrified her select circle by building a house of her own. With equal suddenness she left the class of immaculate maidens in the First Presbyterian Church to whom she expounded from Sunday to Sunday the International Sunday School lessons and began her weekly visits to the Girls' Friendly Home.

Certain members of the Ladies' Aid Society said Miss Abbie was very deep, and that these strange outcroppings were but indications of her real nature. The minister's sister, who was something of a psychoanalyst, mentioned leebegs in this connection, with their small percentage of visibility as compared with their hidden volume.

Driving along the dusty summer road, this Sunday afternoon, with the houses thickening on each side as they approached the city, Miss Abbie, roused from her dream, carefully studied her new companion. She suddenly felt that she was about to experience another outcropping. An extravagant wish swelled her heart; a daring, unheard of ambition convulsed her soul. . . . She would do it. No matter what any one said. Let the minister's sister rave. She would show them. She would adopt the girl if she could get her.

(To Be Continued.)

An Envious Position

Practically no Tuberculosis Among Dairy Cattle in Fraser Valley

Dr. W. H. McKenzie, superintendent of the Dominion health of animals branch, in British Columbia, is of opinion that tuberculosis among dairy cattle in the Fraser Valley, B.C., will be practically eradicated within a year. Last year almost 8 per cent. were infected on test; this year's inspection showed a reduction of infection to 1.11 per cent. Next year he expects the reactors will be lower than one-half of one per cent. in this area. That is the rate officially regarded as T.B. free. Testing of herds from Hope to North Bend has been done, and of the 42,500 tested this year only 430 were condemned. Last year 1,338 out of 46,989 reacted. This year he says, farmers in the Fraser Valley, realizing the value of healthy herds welcomed the veterinarians who conducted the test.

For Rheumatic Pains.—The pains and aches of Sciatica and Rheumatism should be treated with Dr. Thomas' Electric Oil. The soothing and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory pains, cuts, scratches, bruises and sprains, either in human beings or the lower animals.

Had Several Reasons

A minister who had not been long appointed to a church in the South of Scotland asked one lady how she liked his preaching.

"I didn't like it at all," she answered. "And, pray, why not," he asked. "Well, in the first place," she answered, "ye read yer sermon; an', in the second place, ye didn't read it weel; an', in the third place, it wasn't worth the readin'."

The Emden in the Pictures

German War Film Being Shown in London

Evidence that feeling engendered by the War is dying down is forthcoming from the fact that a German film illustrating the exploits of the Emden is being shown in London by an English firm who are best known as the distributors of the British war films "Ypres" and "Mons." Some people consider that they have taken a bold step in booking his wholly German war picture, but the film is so good and so impartial that there is no reason why British audiences should not welcome it on its merits.

The story begins with the Emden's departure from Tsingtau at the outbreak of war, and winds up with a remarkably vivid portrayal of her final battle with H.M.S. Sydney, off Cocos Island. It is as restrained and as fair as any of the British war films, and has a stronger narrative force than any except that of Zebrugga, without any unnecessary exaggeration of the glory or of the horrors of actual fighting. The War is shown from the angle of the crew of the German raider, and particularly from that of one young officer, a reservist, in business at Tsingtau, who meets his own wife as a passenger on one of the captured British steamers, is put in command of the captured British crews, and eventually dies during the bombardment by the Sydney.

Enough glimpses of her various exploits are shown to give one a pretty good idea of her touch and go career, and the cooperation of the German admiralty has ensured an authentic naval atmosphere. One episode is omitted. That is the interval during the Cocos Battle when the Sydney, seeing the Emden hopelessly stranded, went off to capture her coal tender, the Buresk, before returning to enforce on Captain Von Muller an honorable surrender. The British are treated quite fairly; there is no "hate" anywhere in the picture.—London Correspondence in Free Press.

NO MEDICINE LIKE
BABY'S OWN TABLETS

For Either the Newborn Babe or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child the Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Amour R. R. 1, South Monaghan, Ont., says:—"We have three fine, healthy children to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

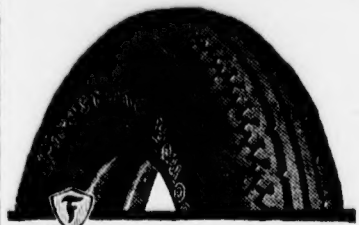

Conan Doyle's Early Struggles

First Twelve Years of Literary Career Were Hard

Sir Arthur Conan Doyle, who was 68 years old recently, is fond of recalling his own early struggles for the encouragement of budding storytellers. Though he had a short story published in "Chamber's Journal"—first encouragement of so many famous writers—when only 19, he wrote for three years after that without an acceptance, and his early books brought but a small financial return. During the first twelve years of his literary career, indeed, he never made more than £58 per annum by his pen, and the first of the famous Sherlock Holmes series he sold outright, after numerous publishers had rejected it, for £25.

Girls Won in Competition

The one and only man in the butter-making class at the Bath and West Agricultural Show took his hand at the churn when he competed against over a dozen, shingled and silk-stockinged dairymaids—and lost. The man was E. J. K. Elliott, from the Somerset Farm Institute, Bridgwater, and the class was for students who had been through a course of instruction in buttermaking at a county school.

Enjoy a Real
Tour on Gum-
Dipped Tires

When you tour on Gum Dipped Tires all roads seem equally good. There is nothing to compare with the smooth, sure performances of these big, low-pressure tires. Jolts and vibrations disappear. Stretches of rough going cannot disturb you or harm the mechanism and well-built structure of your car.

If it is slippery and muddy underfoot, Gum-Dipped Tires, having double the road contact, cling to the road and hold the car unwaveringly to a true, straight course. On grades there is extra traction; at sharp curves or in quick stops you will have perfect control of wheel and brake. Skidding is almost impossible.

Through the development of the exclusive Gum Dipping process, Firestone has tremendously increased tire mileage in balloon tires. This insulates and impregnates every fibre of every cord with rubber, reduces internal heat and friction and delivers thousands of extra miles with added comfort and safety.

Ask any Firestone Dealer to show you the structure of Balloon Gum-Dipped Tires and to tell you their advantages. He is an authority on this type of tire and is in a position to serve you better and save you money. See him to-day.

Little Helps For This Week

Behold, we count them happy which endure.—James v. 11.

Well, to suffer is divine;
Pass the watchword down the line.
Pass the countersign, "Endure!"
Not to him who rashly dares,
But to him who nobly bears,
Is the victor's garland sure.
—John Greenleaf Whittier.

If for some of us, and sometimes for all of us, action cannot mean doing, then remember bearing too is action,—oftenest its hardest part.
—William Channing Gannett.

Endure and dare, true heart;
through patience, joined with boldness, come we at a crown encircled with a thousand blessings.
—Spanish Proverb.

Experimenting on Dental Serum

That dentists soon may be injecting serums to prevent tooth decay is the prediction of a specialist in Chicago Dr. C. N. Johnson, who is experimenting on such a preparation. Tooth decay, he says, is the most common ailment known.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

Pity may be able to love, but a girl isn't willing to accept it as a substitute.

PIMPLES ON FACE
ITCHED BADLY

Skin Became Scaly. Arms Later Affected. Cuticura Heals.

"I suffered from pimples that broke out all over my face. They were large and red, and itched so badly that I scratched them until they would bleed. My skin became scaly and started to peel off, especially around my mouth. Later my arms became affected with pimples."

"I began using Cuticura Soap and Ointment and they helped me. I continued the treatment and in about two weeks I was healed." (Signed) E. M. Bradley, 185 Queen St., Charlottetown, P. E. I., Aug. 11, 1926.

Use Cuticura Soap, Ointment and Talcum to promote and maintain skin purity, skin comfort and skin health; the Soap to cleanse and purify, Ointment to soothe and heal, and Talcum to powder and refresh.

Sample Each Free by Mail. Address Canadian Agent, "Bichonnet Ltd., Montreal." Price Soap 25¢, Ointment 25¢ and 50¢, Talcum 25¢. Cuticura Shaving Stick 25¢.

DRAGGING-DOWN
PAINS RELIEVED

Woman Suffered Nearly a Year.
Lydia E. Pinkham's Vegetable
Compound Brought Her Health.

Moose Jaw, Sask.—"I am going to try to tell you what Lydia E. Pinkham's Vegetable Compound has done for me. I suffered very badly with dragging-down pains and inflammation, also pains in my right side over my hip and down my whole side into my leg. I had it nearly a year when I went to a doctor and he said I would have to have an operation. But my mother said to take Lydia E. Pinkham's Vegetable Compound as it saved her life years before. I took two bottles and I found I was better, so I kept on taking it and also used Lydia E. Pinkham's Sanative Wash. I have had two more children since then and am perfectly well. I used to have to lie down two or three times a day, and now I do all my housework without trouble. I always keep the Vegetable Compound in the house as I find a dose now and then helps me. I am willing for you to use this letter any way you see fit and I will answer letters. If I can help any other woman I'd be only too glad to try."—Mrs. ESTHER HUGHTON, 414 Morse Square, Moose Jaw, Saskatchewan.

Lydia E. Pinkham's Vegetable Compound is a dependable medicine for all women.

BEHIND the beauty of Chevrolet there is
an abundance of strength and stamina,
just as there is a great store of surplus power.
The rugged channel steel frame, the husky
bump-type rear axle, the powerful valve-in-
head engine and every detail of construction
combine to defy the ravages of wear and
tear, of hills and ruts, of mud and sand, of
extremes of climate and of hard, continuous
usage.

As Chevrolet has been designed for beauty,
powered for performance, planned for
economy—so Chevrolet has been BUILT
FOR ENDURANCE.

And this—the most Beautiful, the most
Powerful and the most Rugged Chevrolet in

Chevrolet History—is selling at new, low
prices, the lowest for which Chevrolet has
ever been sold in Canada.
